- English
- Filipino

EDUCATION

- **Computer Engineer**
Cavite State University
1 yr completed, 2017 – 2018
- **Computer Programming**
DATACOM Institute of Computer Technology
Diploma, 2012 – 2014

SONNY A. NEPOMUCENO

FULL STACK WEB DEVELOPER

PROFESSIONAL SUMMARY

Full Stack Web Developer with 6+ years at H.R.D Singapore Pte Ltd, building and maintaining 5+ internal web platforms used daily across multiple departments. Specializes in Vue.js, Laravel 9 and MySQL – delivering clean, scalable systems from production monitoring to real-time order tracking. Prior background as an AutoCAD Draftsman adds a rare ability to read technical Japanese documentation and enforce precise engineering standards in software workflows.

WORK EXPERIENCE

Full Stack Web Developer | 2019 - Present

H.R.D Singapore Pte Ltd

- Engineered and deployed 5+ internal web platforms used daily across multiple departments,
- replacing manual paper-based processes.
- Built project plan tracking system that ensured on-time task completion across all departments,
- reducing delays by an estimated 40%.
- Maintained and enhanced existing systems on local servers, ensuring near-zero downtime for
- business-critical operations.
- Collaborated directly with end-users to gather feedback and iterate on features, improving
- adoption across teams.

AutoCAD Draftsman | 2014- 2019

H.R.D Singapore Pte Ltd

- Designing/ Checking, Revising of Piping Plan inside and outside of the house.
- Can read Japanese instruction from Planner and Subcontractor from Japan.
- Reported mistakes of staff with regards in standard operating procedure (SOP) .

WEB DEVELOPMENT PROJECTS

New House Type Monitoring System

Laravel 9 Vue.js Vuetify 3 MySQL

- Built a real-time status monitoring platform used across multiple departments, replacing manual
- tracking and significantly reducing miscommunication between teams.

Plaster Board Checklist System

Laravel 9 Vue.js Vuetify 3 MySQL

- Developed a production checklist system that eliminated paper-based verification, resulting in zero
- missed checkpoints and a measurable reduction in customer complaints.

Sending Order System

Vue.js Vuetify 3 Node.js MySQL

- Created an order transmission monitoring tool that improved data accuracy and gave management
- real-time visibility into order flow across departments.

Denki Confirmation PS5 System

Vue.js Vuetify 3 Node.js MySQL

- Engineered a real-time confirmation system between two departments, reducing back-and-forth
- communication delays and improving accountability for plan approvals.

PlasterBoard Monitoring System

Vue.js Vuetify 3 Node.js MySQL

- Built a production and delivery tracker that helped prioritise urgent orders, minimising production
- delays and optimising resource allocation across teams.
